

Caregivers confirm: The ergonomic design of MoliCare® Premium Elastic facilitates better incontinence care.

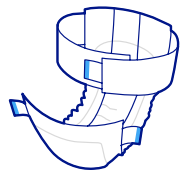

64 professional caregivers in Germany and France participated in an ergonomics study and **agreed:** The ergonomically designed product MoliCare® Premium Elastic outperforms traditional and belted slips.

Elastic slip

Traditional slip

Belted slip

Fast application

→ Up to 4 weeks' time saved for caregiver.²

88% of caregivers rated it "fastest."¹

- ✓ Quickest changing and removal
- ✓ Less disruption to patients
- ✓ More efficient product usage

Easy application

→ Helps to maintain caregivers' long-term health.

92% of caregivers rated it "the most back-friendly."¹

- ✓ Fewer stressful hand rotations
- ✓ Less frequent stressful finger postures and pincer grips

Ergonomic usage

→ Increases quality of incontinence care & relieves burden on caregivers.

96% of caregivers agreed "easiest to apply."¹

- ✓ The elastic slip is the most back friendly
- ✓ Alleviates physical stress
