

# Placing a peripheral venous catheter

## Material Checklist:

Hand disinfectant	✓
Tourniquet	✓
Swabs	✓
Skin antiseptic	✓
Gloves	✓
Peripheral venous catheter (PVC), sterile plug	✓
Sterile dressing (preferably transparent dressing*)	✓
If required fixing materials, e.g. strips of plaster	✓
Surface disinfectant	✓

\* Use a transparent dressing for securing a cannula in semi-conscious patients to facilitate visual inspection of the insertion site.

Pay particular attention to these critical moments to prevent infections.

Hygienically correct procedures prevent nosocomial infections that are cause of 91 000 deaths per year in Europe alone.

Research for infection protection
